

Lead Cable Installer

Install Cat5, Cat6, RG6 and fiber Optic cables in Commercial buildings.

Build out an MDF and an IDF.

Install cameras, APs speakers and a paging system.

40 hours a week. **Permanent employment for those who want it.**

Experience is required.

Lead installer will need to have experience in leading a crew of up to 4 members with current verifiable experience in reading blue prints.

Lead installer will be familiar with proper safety practices, and installation procedures for terminating, testing, troubleshooting and documenting a cable plant system.

Have experience with FLUKE DTX-1800 for testing both riser and horizontal copper/fiber and OTDR troubleshooting and capable of reading and interpreting blueprints to provide daily clear directions to crew members, and onsite workers/ customers.

Lead installer will be capable of interfacing with the customer or other trade representatives as required on a day to day basis. They will also inform the site lead of any possible problems or potential changes in the scope of work. Lead must have good communications skills and full knowledge on how to work with site contractors.

BICSI instillation or manufacturer certifications are a plus, but not required.

All applicants will need to pass a drug screening, basic back ground check, and meet company minimum driving standards.

Must be in good physical shape to repeatedly climb ladders, bend, crouch and crawl for an entire working shift. Must also be able to operate a scissor lift for work at heights of 20 feet or more.

RHEMA IS provides structured cabling and low voltage hardware installation to retail stores during remodel, expansion and new builds.

In a typical store we install and terminate a variety of cables including Cat5, Cat6, RG6 and fiber optic. We install APs, cameras, speakers, paging systems, switches, DVRs and other hardware. We will update or install new racks and trays in the MDF as well as build and install new IDF cabinets.

Every store is unique with its own challenges and obstacles. Each site takes three to six months to complete. Remodels are night work 9PM to 6AM Sunday through Thursday nights while the store is closed. New builds are daytime work, 7 AM to 4 PM Monday to Friday. When distance mandates, we minimize driving time by booking hotels for the work week, then home on weekends.
